

Advanced Resident Antero-Lateral Skull Base Approaches

Course Description:

This course was developed for senior neurosurgical and otolaryngology residents by experienced academic neurosurgeons and otolaryngology surgeons. Attendees will be given a comprehensive series of didactic lectures and case discussions on open and endoscopic approaches to the skull base. There will also be a series of modules in the anatomy lab covering these open and endoscopic approaches. The approaches that will be covered include but are not limited to:

- Endoscopic Approaches to Paranasal Sinus Lesions
- Endoscopic Approach to the Anterior Skull Base
- Endoscopic Approach to the Central Skull Base (Retroclival/Infrasellar/Sellar/Suprasellar/Parasellar) via Sphenoid Sinus
- Open Anterior Cranial Fossa Approaches
- Endoscopic Orbital and Optic Nerve Decompression
- Nasal Septal Flap and Endoscopic CSF Leak Closure
- Open Lateral Approaches to the Middle Cranial Fossa and Central Skull Base
- Endoscopic and Transfacial Approaches to Lateral Lesions

Course Directors:

Manish Aghi, MD, Ph.D.
Ivan El-Sayed, MD, FACS

Faculty:

Amol Bhatki, MD
Nripreda Dhillon, Ph.D.
Andrew Goldberg, MD, FACS
Micheal McDermott, MD
Andrew Parsa, MD, Ph.D.
Steven Pletcher, MD

Date and Location:

March 10-12, 2011
University of California,
San Francisco
San Francisco, CA

Antero-Lateral Skull Base Approaches

Course Objectives

- Understand Endoscopic Paranasal Sinus Anatomy Relevant to Skull Base Approaches
- Perform Endoscopic Approaches to the Anterior and Central Skull Base
- Perform Open Approaches to the Anterior Cranial Fossa
- Perform Open Lateral Approaches to the Middle Cranial Fossa and Central Skull Base
- List the relative merits of open versus endoscopic approaches to anterior, central, and lateral skull base lesions

Registration:

Space is limited to 18 participants for the 2 day course. Reservations will be made on a first come first served basis.

Accommodations:

Air fare and lodging will be provided by Stryker. Air carrier will be determined on an individual basis.

Course Agenda

Thursday, March 10, 2011

6:00pm-6:30pm Skull Base Surgery: Approach Selection Open versus Endoscopic

Friday, March 11, 2011

8:00am-8:30am Endoscopic Anatomy Paranasal Sinuses and Paranasal Sinus Lesions

8:35am-9:15am Endoscopic Approach to Anterior and Central Skull Base

9:15am-9:50am Open Anterior Cranial Fossa Approaches:

BREAK 10 MINUTES

10:05am-10:30am Subcranial Orbital Anatomy and Orbit and Optic Nerve Decompression

10:20am-10:55am Nasal Septal Flap and CSF Leak Closure

11:00am-11:50am Central Skull Base Anatomy and Approaches

12:00pm-1:00pm Lunch with the Professors

1:00pm-5:00pm Anatomy Lab – Endoscopic and Open Approaches

Saturday, March 12, 2011

8:00am-8:55am Lateral Approaches to Tumors of Middle Cranial Fossa Central Skull Base

9:00am-9:35am Endoscopic and Transfacial Approaches to Lateral Lesions

BREAK 10 MINUTES

CASES DISCUSSIONS

9:45am-10:30am Anterior Skull Base

10:35am-11:20am Lateral Skull Base

11:25am-11:55am Central Skull Base

12:00pm-12:30pm Nasal Cavity/ Paranasal

1:00pm-5:00pm Anatomy Lab – Endoscopic and Open Approaches
